

# Your IJA-funded Project is Not Complete Without Lighting

## What You Need

## How We Can Meet Your Needs

Municipalities and Local Government

The ability to easily add on and scale in the future with cohesive aesthetics, energy and cost savings, and optimized operations resulting in cost-effective maintenance.

Functional and decorative outdoor and indoor lighting and controls solutions, to address downtown business districts, streets, transit, parks and rec, parking, and various city buildings and facilities.

Ports, Land Sea and Air

Solutions to improve visibility and promote a safe working environment, paired with energy savings, cost-effective maintenance, and optimized operations.

Demanding environment lighting and controls solutions for interior and exterior spaces, including high masts, floods, low and high bays, emergency lighting, and AC inverters.

Water and Waste Water

Robust and durable lighting and controls solutions designed to handle demanding environments, with the ability to easily scale in the future and enable energy and cost savings.

General area, roadway, outdoor task, indoor facility, hazardous area and other lighting and control solutions for water treatment plants. Retrofit packages are also available to convert to LED without disturbing infrastructure systems beyond individual luminaires.

Department of Transportation

The ability to easily add on and scale in the future with cohesive aesthetics, energy and cost savings, and optimized operations resulting in cost-effective maintenance.

Luminaires and controls to address high mast needs for highway interchanges, offset and roadway, underpass and tunnel, and general area maintenance yard applications.

Transportation Systems

Robust and durable equipment designed to handle demanding environments, with cohesive aesthetics in public spaces, that also provides energy and cost savings as well as optimized operations and maintenance to reduce downtime.

High performance lighting and controls solutions for applications including transit and intermodal facilities, roadways, tunnels, indoor spaces, and more.
